BRAND GUIDELINES · VERSION 1 · NOVEMBER 2026

truekeeps

How Truekeeps looks, sounds and feels.

One reference for anyone designing for Truekeeps: the website, social posts, packaging, the books themselves and WhatsApp messages. Follow it and every touchpoint will feel like the same brand.

01 · BRAND ESSENCE

Warm. Emotional. Clean.

Truekeeps turns phone photos into a real book a family can hold. Everything we design should feel like opening a family album: warm and personal, but never cluttered.

Warm
Soft paper backgrounds, natural light, real families. Never cold, techy or corporate.

Emotional
The customer's photos are the hero. Rose is used where feeling peaks: one word, one button, one heart.

Clean
Lots of empty space, few colours at once, one clear action per screen. Easy is part of our promise.

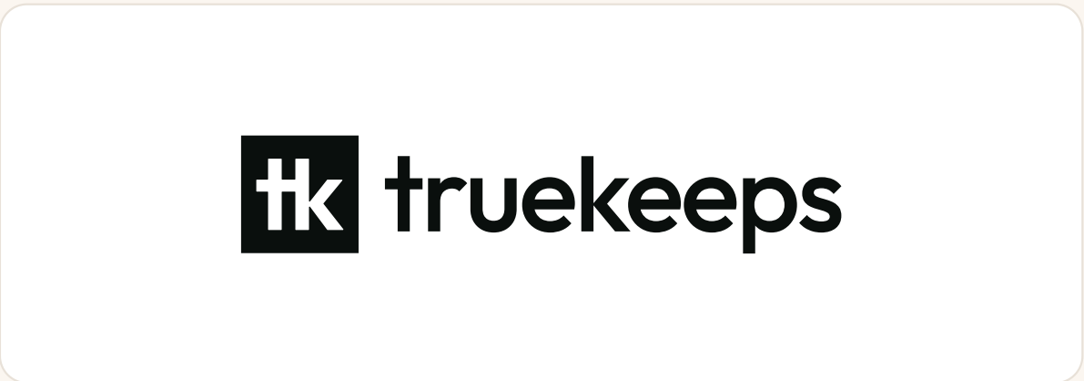
02 · LOGO

The logo

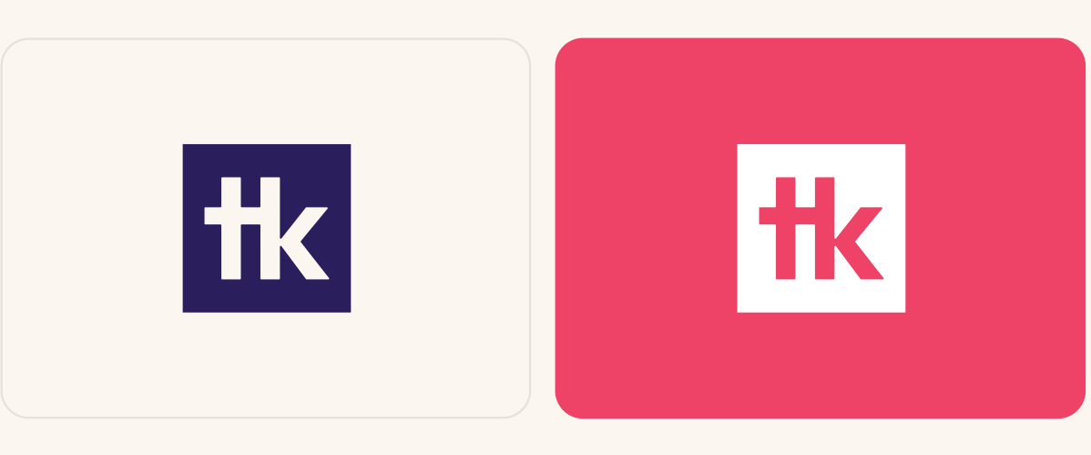
Two parts: the **tk mark** (the square) and the **wordmark** (the word "truekeeps"). Always use the original artwork files. Never retype the name in a font.

Primary. Indigo on Paper or white. Use this whenever you can.

Reversed. White on Indigo, or white on dark photos.



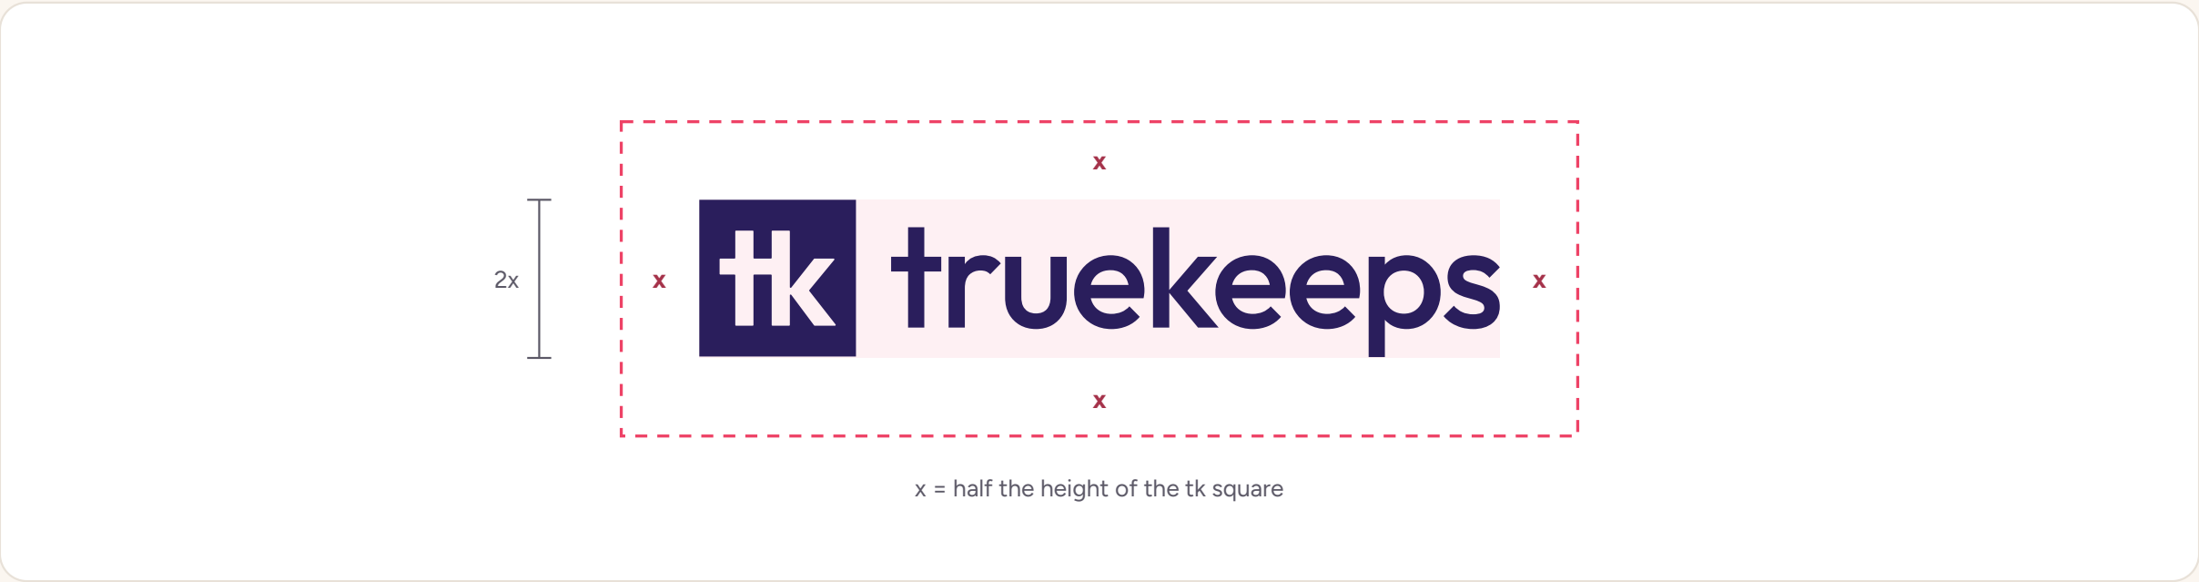
One colour black. Only when printing in one colour (receipts, stamps, labels).



Mark only. For tiny spaces: website tab icon, Instagram profile picture, book spine, stickers. White mark on Rose is allowed here only.

Clear space and minimum size

Keep empty space around the logo equal to **half the height of the tk square** (we call it "x"). Nothing goes inside this space: no text, no edges, no other logos.



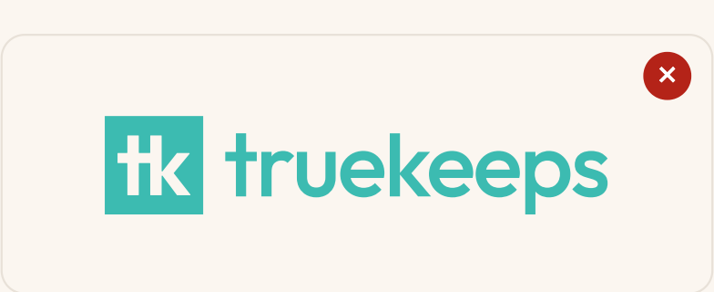
x = half the height of the tk square

FULL LOGO · SCREEN	FULL LOGO · PRINT	MARK · SCREEN	MARK · PRINT
120 px wide	30 mm wide	24 px	7 mm

Smaller than this, the "tk" cut-out starts to fill in, especially in print.

Don't

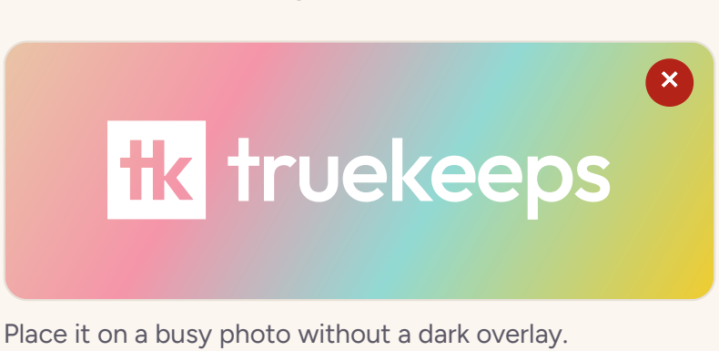
Stretch or squash it.



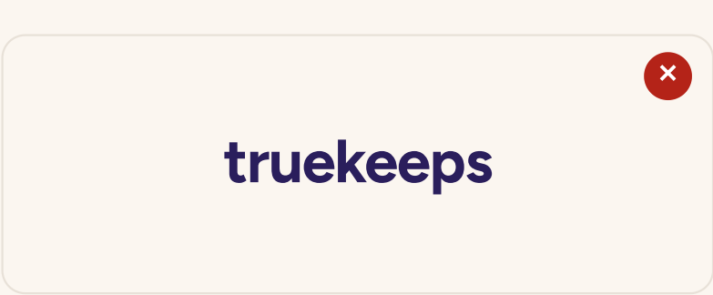
Use colours outside Indigo, white or black.

Rotate or tilt it.

Add shadows, outlines or effects.



Place it on a busy photo without a dark overlay.



Retype the name in Figtree or any font.

03 · COLOUR

Colour palette

Every colour has one job. When a colour always does the same thing, people start to recognise Truekeeps by colour alone.

Indigo
Logo, headings, packaging, dark sections.

ACCENT · EMOTION
Rose
Main button (as Rose 600), highlights, offers. Small amounts.

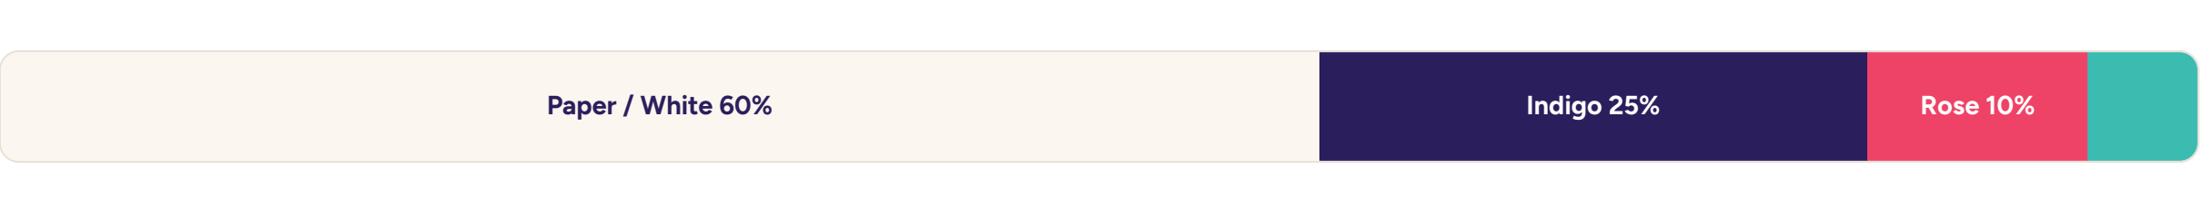
TEXT
Ink
Long paragraphs and small print.

How much of each



Why: a small amount of Rose works like a spotlight. If everything is loud, nothing stands out, and the customer's photos lose attention.

Shades

500 is the original colour. Lower numbers are lighter, for backgrounds. Higher numbers are darker, for text. Tap any shade to copy its code.

Rose

600 for buttons, 700 for Rose text, 50 for soft backgrounds.

Which text works on which background

The score shows how easy text is to read. 4.5 or more is safe for all text. 3 to 4.5 is only for big, bold text.

EXAMPLE	PAIRING	SCORE	USE
Aa Memories	Indigo on Paper	13.58	All text
Aa Memories	Ink on Paper	17.98	All text
Aa Memories	White on Indigo	14.60	All text
Aa Memories	White on Rose 600 (buttons)	4.93	All text
Aa Memories	White on Rose 500	3.75	Big bold text only
Aa Memories	Rose on Paper	3.49	Big bold text only
Aa Memories	Rose 700 on Paper	6.19	All text
Aa Memories	Teal 900 on Teal 100 (badge)	8.23	All text
Aa Memories	Teal on White	2.35	Never for text
Aa Memories	White on Mist	1.65	Never for text

Button rule: buttons use **Rose 600 (CA3A58)**, not the original Rose. White text on the original Rose is too light for small button text. Rose 500 stays for highlights, big headlines, graphics and print.

Print values

COLOUR	SCREEN (HEX)	PRINT (CMYK) STARTING POINT	PRINT RISK
■ Indigo	#2A1E5C	54 · 67 · 0 · 64	Low
■ Rose	#EE4266	0 · 72 · 57 · 7	Medium, may dull or shift orange
■ Rose 600	#CA3A58	0 · 71 · 56 · 21	Medium
■ Teal	#3CBBB1	68 · 0 · 5 · 27	High, often prints flatter
■ Mist	#C4CBCA	3 · 0 · 0 · 20	Medium, may pick up a tint
■ Ink	#0A0F0D	60 · 40 · 40 · 100 (rich black)	Low. Use 0·0·0·100 for small text
□ Paper	#FBF6F0	0 · 2 · 4 · 2	Often use paper stock instead

Before printing packaging: ask your printer for the closest Pantone match and approve a test print in daylight. These CMYK numbers are rough conversions. Teal and Rose are most likely to print duller than on screen.

04 · TYPOGRAPHY

Typography

Aa

Figtree
Body font. Free on Google Fonts. Friendly, round and very easy to read on phones.

Regular 400 · body text
Medium 500 · links, nav
SemiBold 600 · labels, badges
Bold 700 · buttons, card titles

Heading font: to be decided
You've chosen to settle this later. Until then, use **Figtree ExtraBold (800)** for headings, as this page does. Your website currently uses a wide display font in all capitals.

My honest view: all-caps headings in a wide, quirky font feel loud and techy, which fights "warm and emotional". When you choose, try sentence case ("Your best moments deserve more than a phone.") and compare.

Type scale (website)

H1 · 48 / 56 px Heading font	Your best moments
H2 · 32 / 40 px	From camera roll to keepsake
H3 · 20 / 28 px Figtree 700	Pick the moment
Body · 16 / 26 px Figtree 400	Design it yourself in minutes, or let us create it for you. Then hold it, share it, and keep it forever.
Small · 14 / 22 px	Preview every page before you order.
Eyebrow · 12 px 600, caps, +16% spacing	HOW IT WORKS

Text colour: headings in Indigo, body text in Ink at about 85% (or Indigo 400 for softer text). Keep lines of body text under about 70 characters wide so they're easy to read.

05 · BUTTONS & UI

Buttons and small parts

One main action per screen, always in Rose. Everything else steps back.

Buttons
Make my book → · Hover
See designs · How it works
Main: Rose 600, white text, fully round. **Second:** Indigo outline. **Third:** underlined text link.

On dark
Make my book → · Sign in
On Indigo or dark photos, the main button stays Rose. The second button turns white.

Badges
✓ Order confirmed · New design · 12×12 hardcover
Teal only for success. Rose for "new" or offers. Indigo tint for plain info.

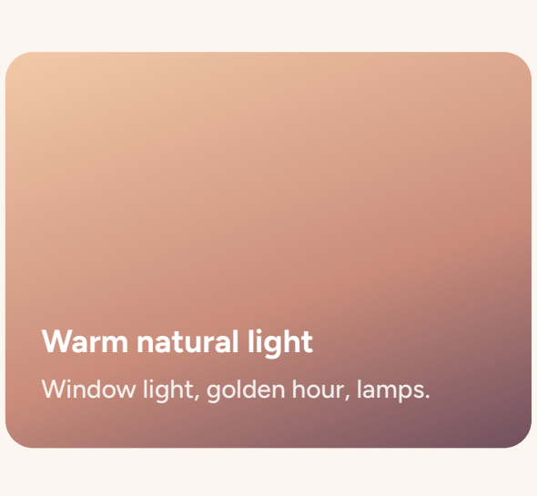
Selection & steps
Wedding ✓ · New baby · Birthday · Travel
1 · 2 · 3
Selected items and step numbers use Indigo, not a separate bright blue.

The highlight
Not a print-out. A real keepsake.
Your website already does this well. It becomes our signature move: a Rose block behind the one most emotional phrase. Use it at most once per screen, on headlines only.

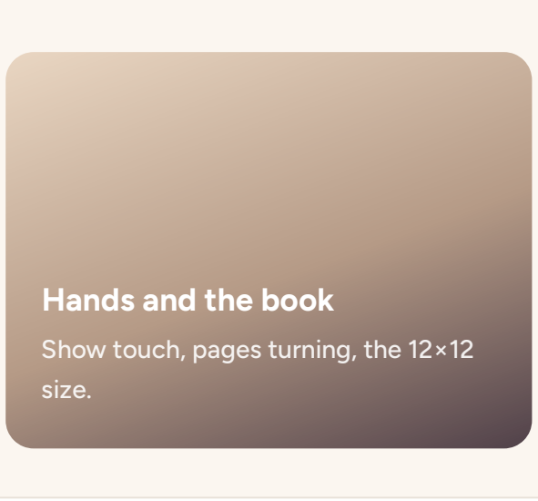
06 · PHOTOGRAPHY

Photo style

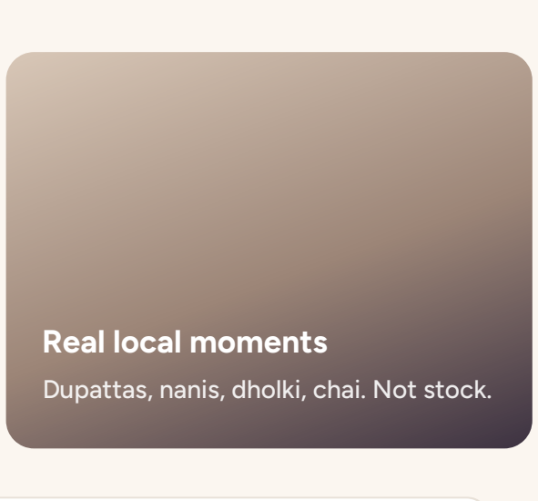
Your current website photos are on the right track: real Pakistani families, warm light, hands holding the book. Keep doing that.



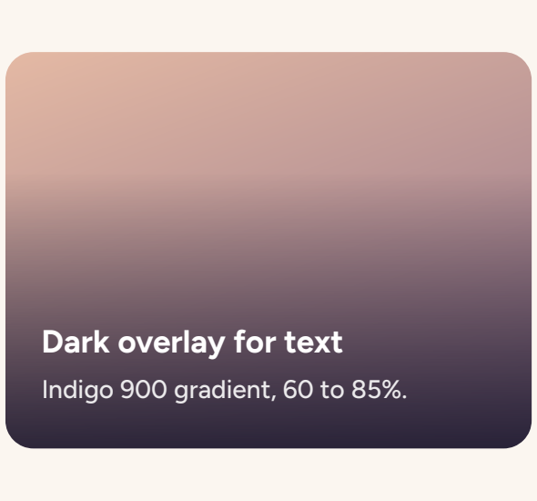
Warm natural light
Window light, golden hour, lamps.



Hands and the book
Show touch, pages turning, the 12×12 size.



Real local moments
Dupattas, nanis, dholki, chai. Not stock.



Dark overlay for text
Indigo 900 gradient, 60 to 85%.

Avoid: cold blue light, heavy filters, Western stock families, and photos where the book is not visible. If you put text on a photo, add an Indigo gradient overlay so the text stays readable.

07 · VOICE

How Truekeeps talks

Like a warm friend who's good at this. Simple words, short sentences, no pressure.

SAY	DON'T SAY
"Your photos deserve more than a phone."	"Premium bespoke photo solutions."
"We'll lay it out for you. Change anything you like."	"Leverage our AI-powered layout engine."
"Your book is printing! We'll WhatsApp you when it ships."	"Hurry! Limited time! Order NOW!!!"

08 · WEBSITE

Bringing the website in line

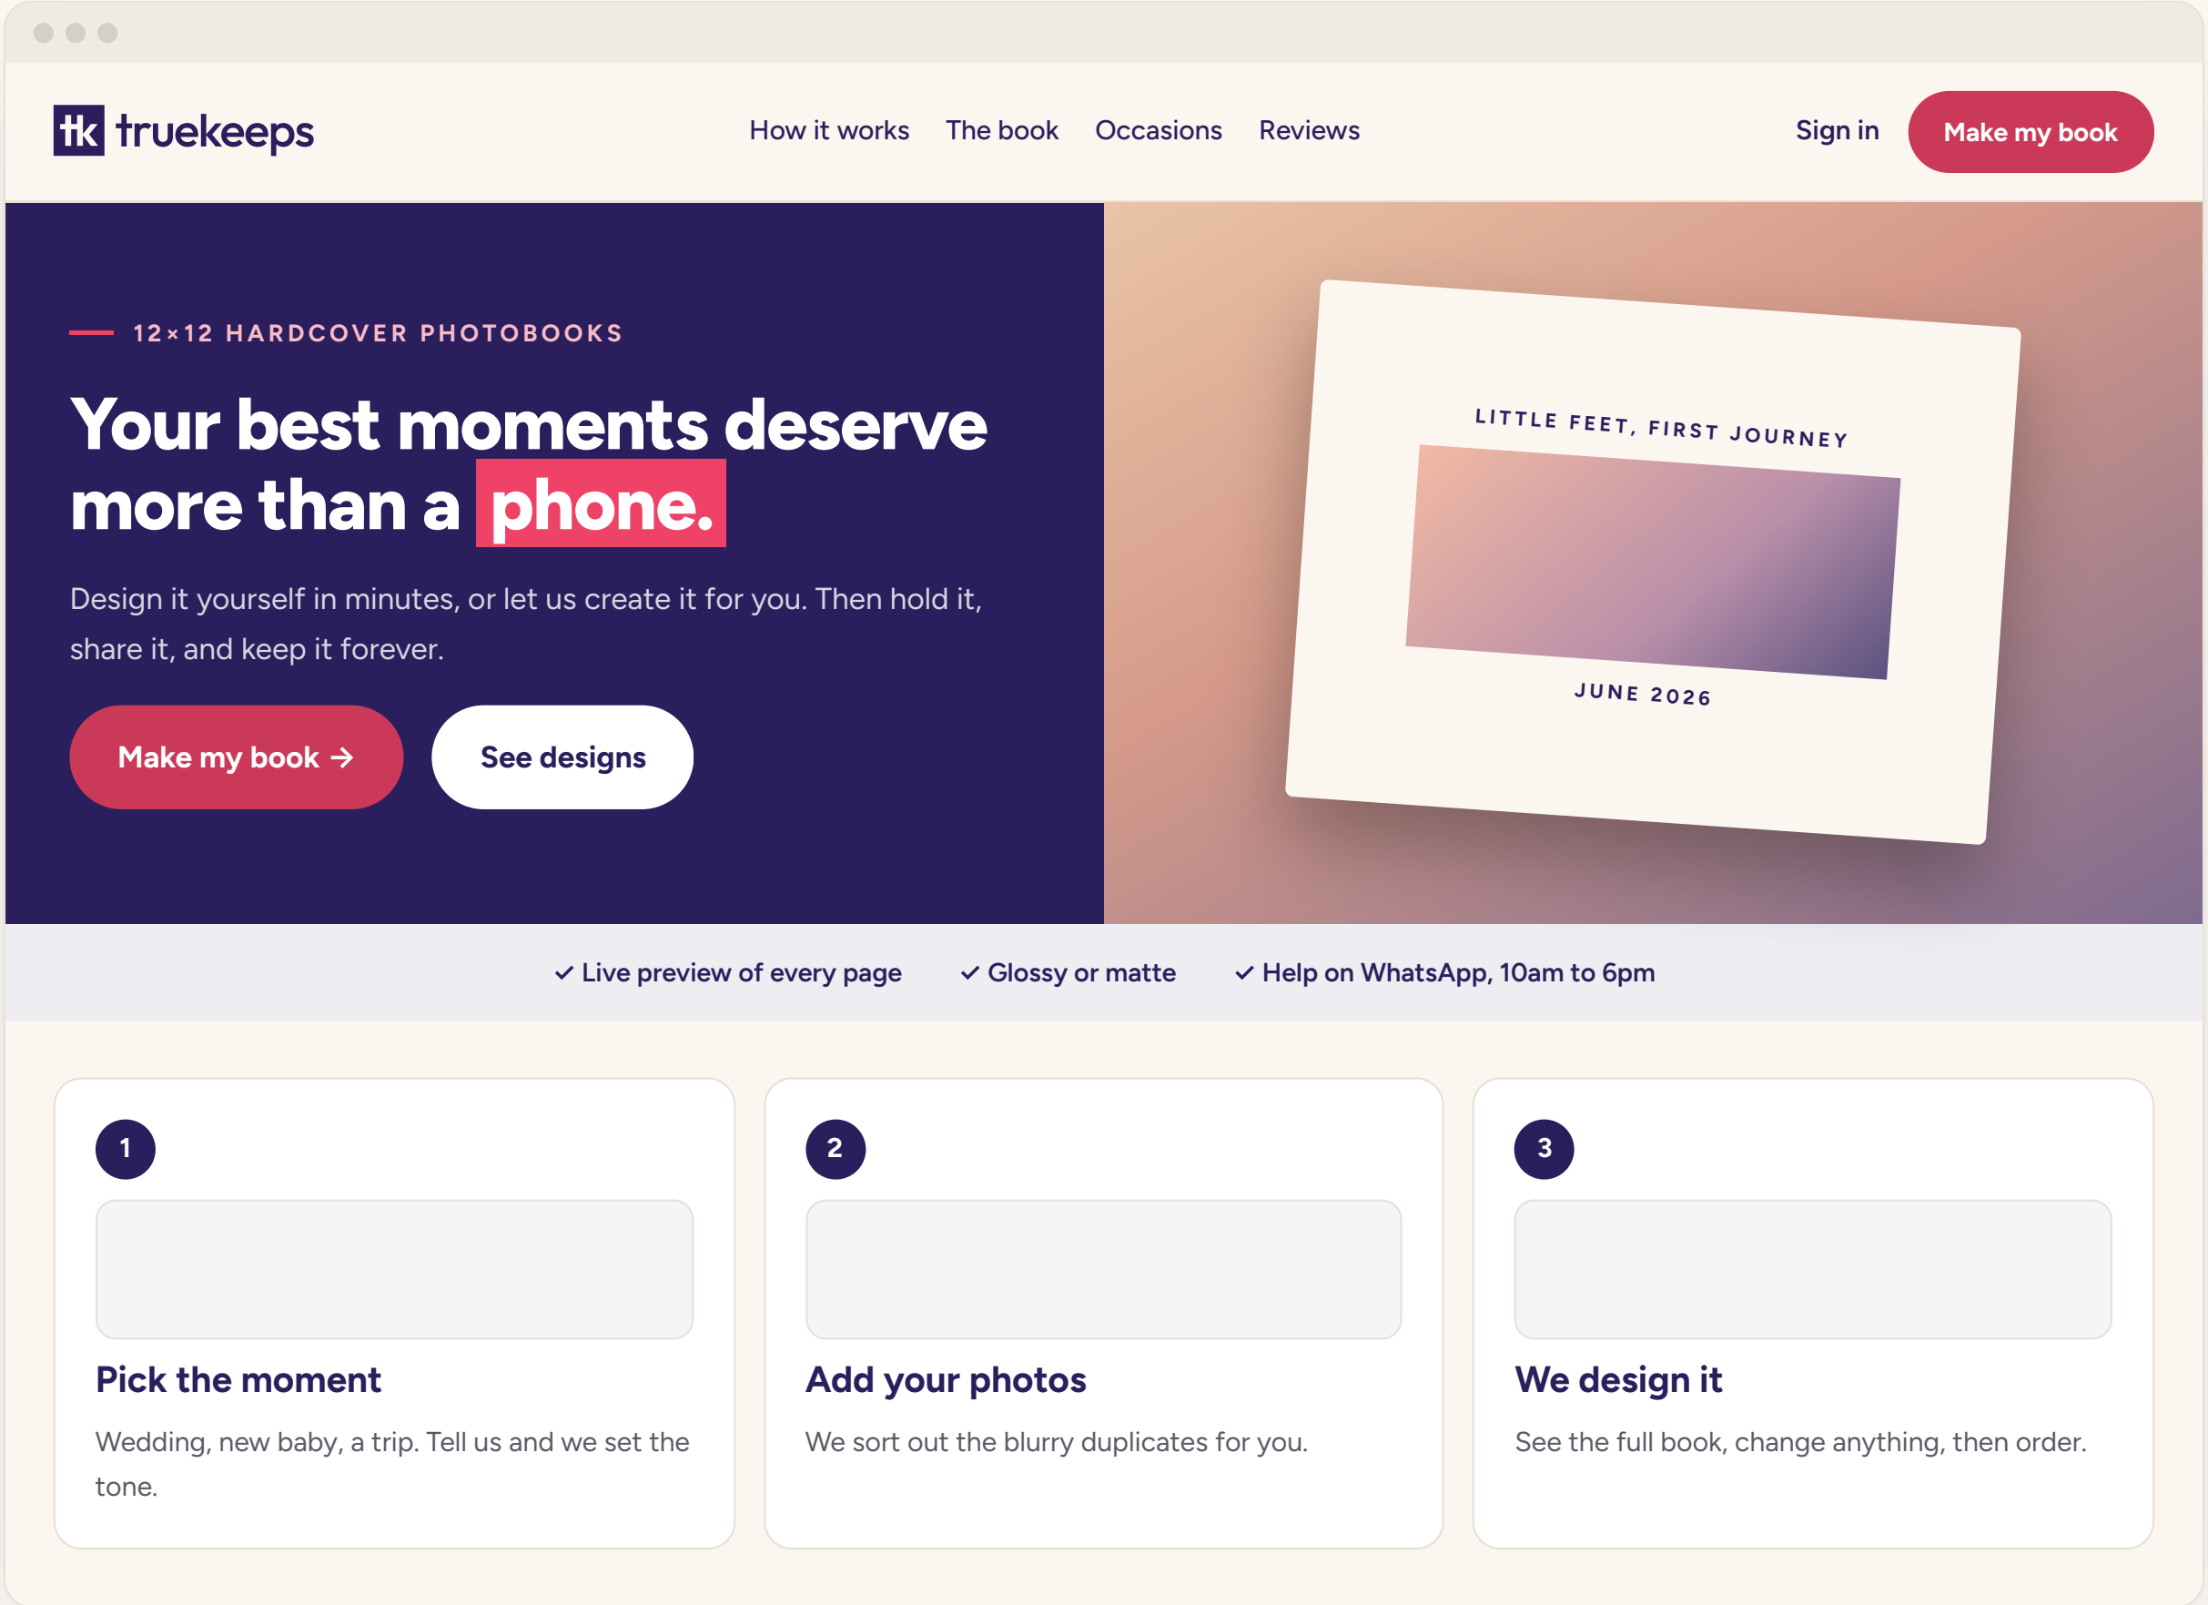
I measured the colours in your screenshots. The site uses about 9 colours, and 4 of them aren't in your palette. That's why it feels close, but not quite one brand.

WHERE	ON SITE NOW (APPROX.)	CHANGE TO
"Start free" button, step numbers	■ 163491 royal blue	■ Indigo, or make "Start free" a Rose button
Selected occasion (Wedding)	■ 0138FF electric blue	■ Indigo border + Indigo 50 fill
Eyebrow dash, small icons	■ F1CC2C yellow	■ Rose (see note below)
Headings, trust bar	■ 2E2E2D charcoal	■ Indigo headings; trust bar in Indigo 50
"Make my book" button	■ CB1657 deep pink	■ Rose 600 (very close already)
Logo	■ 1E154B	■ Indigo 2A1E5C (use the SVG file)
Page background	□ F9F9F5	□ Paper, slightly warmer
Step card images	■ B9C0C0	■ Mist. Already matches.

Screenshots can shift colours slightly, so check the exact values in the website's code with your developer.

The yellow question. Yellow isn't in your palette, but it is warm and it looks good with Indigo. Two options: (1) replace it with Rose and keep the palette tight, or (2) make a warm yellow an official small accent and drop Teal. My pick is option 1 for now. Fewer colours means a stronger brand, and you can test yellow later.

What the top of the site could look like



12×12 HARDCOVER PHOTOBOOKS

Your best moments deserve more than a phone.

Design it yourself in minutes, or let us create it for you. Then hold it, share it, and keep it forever.

✓ Live preview of every page ✓ Glossy or matte ✓ Help on WhatsApp, 10am to 6pm

1 **Pick the moment**
Wedding, new baby, a trip. Tell us and we set the tone.

2 **Add your photos**
We sort out the blurry duplicates for you.

3 **We design it**
See the full book, change anything, then order.

What changed
One button label ("Make my book") everywhere instead of two ("Start free" and "Make my book"). One button colour. Indigo replaces blue and charcoal. Trust bar uses claims you can prove today.

Keep
Your hero photo style, the Rose highlight block, the 3-step cards on Mist, and the dark photo sections. These already fit the brand.

Fix before launch, this is a trust risk: the trust bar says "4.9/5 from 12,000 reviews", "Love-it guarantee", "Free shipping from Rs 10,000" and "FSC-certified paper". If these aren't true yet, remove them. Fake reviews destroy trust the moment someone notices, and a "Love-it guarantee" clashes with your policy of no refunds once printing starts. Only show FSC if your printer can prove it.

Truekeeps brand guidelines, version 1. Paper (FBF6F0) and the button shade Rose 600 are additions to the original five colours. Heading font is still to be decided. Readability scores use the standard web accessibility formula (WCAG).
